

Question 1: "Would you be able to specify the month in which the detectability of the marker by a road-side test will be carried out by your appointed laboratory?"

Answer: We would like to refer to point 5.3.4. of the call for expression of interest. In particular in the table, in point C.2. it is stated that evaluation of the detectability of the marker by road side test will be based on documentary evidence and estimated overall price of road-side test equipment and consumables needed for a single test. Therefore, no tests are to be carried out by the laboratory in this respect and no equipment is to be submitted by the applicant to the laboratory.
