(\*) = Figure included in...

CY (\*) Figures for Columns I, II, III, IV, V are included in column VI: no separate figures are available

FR (\*) As taxes on the consumption of natural gas, coal & coke and electricity were transferred from the customs administration to the tax administration from 01/01/2022 on, slight variations may exist due to discrepancies across information systems. They remain moderate, with no option for a pro-forma transition impact measurement. The revenues in columns VII and VIII are gross revenues.

FR (\*\*) On top of the abovementioned transfer, revenues indicated in column IX are net ones: they reflect better the adaptation of the per unit tax rate on electricity consumption to address the war in Ukraine. Most of the drop is due to a decrease in gross revenues: total reimbursements (most of which are not related to adaptation measures) only account for € 261 million.

LT (\*) See Article 15(1) (g) of Council Directive 2003/96/EC.

LT (\*\*) See Council Directive 2004/74/EC.

LT (\*\*\*) Excise duty exemption is applied for natural gas used as motor fuel in local regular busses; from 2018 excise duty exemption is applied for natural gas used as motor fuel.

LV (\*) No separate data are available since 2014.

<sup>3</sup> In 2020 tax returns of all fuels differ significantly from tax revenues. In order to distinguish between leaded and unleaded petrol and between diesel, LPG and methane and heavy fuel oil the tax returns are scaled to the revenues. This distinction is not available in the data of the tax revenues.
