Section E

Tax Regimes for Incorporated SMEs and Partnerships

SECTION E: RELEVANT TAX REGULATIONS FOR SMEs AND PARTNERSHIPS

1. Incorporated SMEs: Special Tax Regimes

According to the European Commission's Recommendation 2003/361/EC, small and medium-sized enterprises are characterized by the staff numbers, the turnover and the balance sheet total. However, it is difficult to use these definitions in order to classify specific taxation rules for small and medium sized entities. For instance, the application of such specific rules often depends on the size of taxable profits. Therefore, we calculate effective tax rates for the most favourable case, i.e. we assume that all requirements for being eligible for the special tax regimes are fulfilled or – when progressive tax rates are applicable – we consider only the lowest tax rate.

There are three types of designing a special tax regime. Compared to big corporations, small and medium sized enterprises can be privileged by means of a lower statutory corporate income tax rate, a modified corporate income tax base or a tax relief from other taxes. In the overview on some selected tax regimes provided below, we not only consider special tax regimes for SMEs but also progressive tax schedules for companies.

Belgium

In Belgium, a company qualifies as an SME according to Art. 15 of the Belgian Company Code if it does not exceed one of the following criteria in two consecutive accounting years:

- A year average number of staff of 50.
- A turnover (excluding VAT) of EUR 9,000,000.
- A balance sheet total of EUR 4,500,000.

For an SME to benefit from the reduced corporate income tax rates, further conditions need to be fulfilled. Depending on the company's taxable profits, the following reduced progressive tax rates apply (since 2003):

| Taxable profit | | Tax rate | |
|----------------|-------------|----------|--------|
| 0 | - € 25,000 | | 24.25% |
| € 25,001 | - € 90,000 | | 31.00% |
| € 90,001 | - € 322,500 | | 34.50% |
| > € 322,500 | | | 33.00% |

Before 2003, the applicable progressive tax rates amounted to 28%, 36% and 41%. For the calculation of the effective tax level, we consider the first tax bracket and take into account the austerity surcharge of 3%. Currently, the resulting effective tax rate considered is 24.98%.

Since the financial year 2006, companies can deduct notional interest expenses from their taxable profits. The deduction is based on the company's equity and calculated by multiplying the equity by a fixed percentage determined by the government. For 2017, the general rate is 0.237%. For small- and medium-sized companies the interest percentage is increased by 0.5 percentage points and thus amounts to 0.737%.

Croatia

Effective from 1 January 2017, a reduced corporate tax rate of 12% applies to companies with annual revenues of less than HRK 3 million.

Bulgaria

In 2000 and 2001, there was a reduced corporate income tax rate of respectively 20% and 15% for companies other than banks and financial institutions with annual taxable profits not exceeding BGN 50,000.

France

In 1998 and 1999, corporations with an annual turnover of less than FRF 50 million are subject to a reduced effective statutory tax rate of 36.67%. Since 2000, corporations with an annual turnover below FRF 50 million or respectively below € 7,630,000 are subject to the standard corporate income tax rate and a surcharge. However, the additional solidarity surcharge of 3.3% that has been introduced in 2000 is not levied on these corporations.

Since 2001, the nominal corporate income tax rate was lowered from 26.5% (2001) to 15.45% (2002 - 2004), 15.225% (2005) and 15% (2006 - 2016).

Up to 2009, the *taxe professionnelle* was capped, i.e. it should not exceed 3.5% of the company's value added if the annual turnover is below € 21,350,000 (FRF 140,000,000). If the annual turnover is between € 21,350,000 (FRF 140,000,000) and € 76,225,000 (FRF 500,000,000), the limitation is 3.8% of the value added. Companies with an annual turnover exceeding € 76,225,000 (FRF 500,000,000) are subject to a limitation of 4% of the value added. Since assumptions on companies' average value added might be of a speculative nature, for the calculation of effective tax levels we assume that the limitation already applies. Hence, an additional investment is effectively not taxed by the *taxe professionnelle*. Note that the *taxe professionnelle* was abolished in 2010.

Germany

Small and medium-sized corporations are, in general, taxed in the same way as large corporations. A small and medium-sized company with working capital not exceeding € 204,517 (DM 400,000), however, may claim an additional depreciation of up to 20% of the cost of acquisition or manufacturing of new movable assets. These companies may, furthermore, set up a reserve for a new investment in fixed assets up to 50% of the expected acquisition cost in 1998-2000 and up to 40% for new reserves made in the years 2001-2017. The new investment must be carried out within two years. Additionally, the reserve may not exceed € 200,000. The investment reserve is dissolved and charged against ordinary depreciation plus the maximum 20% additional allowance in the year of acquisition (i.e. when the first depreciation allowance is granted).

Hungary

From 2005 to 2007, there is a reduced corporate income tax rate of 10% on taxable profits up to HUF 5 million. From 2008 onwards, this limit is increased to HUF 50 million. For the 10% rate the following conditions have to be fulfilled:

- The annual turnover of the enterprise does not exceed € 50 million;
- The balance sheet total is less than € 43 million and
- The enterprise employs less than 250 persons.

From 1 January 2011, the annual upper threshold for the 10% rate is HUF 500 million, i.e. only the excess over this threshold is taxed at 19%. In 2017 Hungary has abolished the progressive schedule. Thus SMEs are subject to the same CIT rate as large corporations.

Latvia

The tax relief for small enterprises is 20% of the enterprise's income tax computed under the normal rules. Amounting to 80% of the ordinary rate, the reduced rate for SMEs is 20% from 1998 till 2001, 17.6% in 2002 and 15.2% in 2003.

A company qualifies as an SME in a given tax year if at least two of the following criteria are met:

- the balance sheet value of fixed assets does not exceed LVL 70,000,
- the net turnover does not exceed LVL 200,000 and
- the average number of employees does not exceed 25.

This special relief for SMEs is abolished with effect from 1 January 2004.

Starting from 2010, there is micro-enterprise tax which levies 9% on turnover which in turn absolves the micro-enterprise from individual income tax and both employee's and employer's social security contributions. A necessary condition for the micro-enterprise tax regime is that the enterprise must obtain the written consent of all its employees to adopt that status. The employees will no longer have individual income tax and social security contributions deductible from their salaries. No employee may earn more than € 720 per month from the microenterprise if the regime is to apply. With effect from 1 January 2012, persona per procura is also considered as an employee.

In 2017, the rates for the micro-enterprise tax have been adapted. For the first € 7,000 turnover, the 9% rate applies. From € 7,000 to € 100,000 turnover, a 15% rate applies. Above € 100,000 turnover, a 20% rate applies.

Lithuania

Lithuania grants a reduced corporate income tax rate for small and medium sized companies. Both the rates and the requirements to classify as an SME vary over time. In 1998, the reduced corporate tax rate for SMEs is 14.5% and from 1999 till 2001 it is 15%. The nominal reduced rate from 2002 till 2009 is 13%, but in the years 2006 and 2007 it is increased by a "temporary social tax" of 4% respectively 3%. Therefore, the reduced corporate tax rate for SMEs amounts to 17% in 2006 and to 16% 2007. In 2008 and 2009, the corporate tax rate for SMEs amounts to 13%. Since 2010 the standard nominal corporate income tax rate of 15% is lowered to 5% for SMEs by a tax relief. An accelerated depreciation is also available.

The requirements to classify as an SME vary in the periods stated above in the following way: In 1998, a company has to have no more than 50 employees on average and an annual income of less than LTL 500,000 (~€ 145,000). From 1999 till 2001, the employee-limit stays the same but the annual income only has to be below LTL 1m (~€ 290,000). From 2001 until 2011, the company's staff size may not exceed 10 employees on average and its annual income has to be less than LTL 500,000 (~€ 145,000) in order to qualify for the above-mentioned SME tax rates. Since 1 January 2012, this qualification threshold has been increased to LTL 1 million (~€ 290,000). With the introduction of the Euro in Lithuania in 2015, the threshold is now 300,000€ (LTL ~1,036,000).

From 2002 onwards, the additional requirement has to be fulfilled that neither one nor several shareholders on a common basis hold more than 50% of the shares in the company.

Luxembourg

From 1998 to 2001, there is a reduced statutory corporate income tax rate of 20% on taxable profits up to LUF 400,000 and any excess up to LUF 600,000 is taxed at 50%. From 2002 to 2009 the reduced rate of 20% applies to taxable profits up to € 10,000 and any excess is taxed at 26% if the total taxable profits are below € 15,000. Starting in 2010, the reduced rate of 20% applies for profits up to € 15,000 and any excess is taxed at 21%. From 2017 onwards, the reduced rate is lowered to 15% and applies for firms with profits below € 25,000.

Netherlands

Since 2000, a reduced corporate income tax rate applies, if the taxable income does not exceed specific thresholds. In 2000 and 2001 the reduced rate amounts to 30% if the taxable income is below NLG 50,000. From 2002 to 2004 the rate is 29% and applies to the first € 22,689. In 2005 and 2006, the reduced rate is 25.5%. Since 2007, the reduced corporate income tax rate is 20% on taxable profits up to € 25,000 and 23.5% on the next € 35,000. From 2011 on, taxable profit of up to € 200,000 is taxed at 20%, any excess is taxed at 25%.

Poland

Starting with 1 January 2017, a lower corporate income tax rate of 15% applies to small taxpayers (with annual turnover, including VAT, not exceeding EUR 1.2 million) and start-ups (taxpayers starting their economic activity) in the first year.

Romania

From 1999 to 2002, the corporate income tax rate is reduced by 20% if an SME increases employment by 10% compared to the preceding year. Given the fulfillment of this requirement, an SME's profit tax rate is reduced from the normal 38% to 30.4% in 1998 and 1999 and from 25% to 20% from 2000 till 2002. Moreover, from 1999 to 2001, reinvested profits of small and medium-sized enterprises are not subject to corporate income tax.

Spain

From 1998 to 2006, small and medium-sized corporations are taxed at a reduced corporate income tax rate of 30% on taxable profits up to a predefined threshold. The threshold is ESP 15 million from 1998 to 2001, € 90,151 from 2002 to 2005 and € 120,202 in 2006. In 2007, the reduced rate is 25% and applies to the first € 120,202 of taxable income. Since 2009, the tax rate has been reduced to 20% and since 2011, the reduced rate applies to the first € 300,000. In 2015, the rate has been reduced to 15%. Since 2016, the tax rate has been increased to 25%. A surcharge of 0.75% was levied on the corporate income tax liability from 1998 to 2011, which was deductible from the taxable corporate income tax base. The local profit tax is not applicable to enterprises with an annual turnover below € 1 million at consolidated accounting group level. Accelerated depreciation is also available under certain conditions if the annual turnover is less than € 10 million at consolidated accounting group level in 2011 to 2017 (€ 8 million in 2010).

United Kingdom

Generally, small and medium-sized corporations are taxed in the same way as large corporations. Reduced corporate income tax rates are, however, applicable: The corporate income tax rate on taxable profits up to £ 300,000 is 21% in 1998 to 1999, 20% in 2000 to 2001, 19% in 2002 to 2007, 21% in 2008-2010 and 20% in 2011-2014. As of the tax year 2015, the reduced corporate income tax rate is merged with the main rate, as the main rate is reduced from 21% to 20%. Marginal relief is available on profits between £ 300,000 and £ 1,500,000.

Furthermore, an additional first-year allowance to the regular depreciation for industrial buildings and machinery of 50% in 1998 and 40% in 1999-2007 is available if the annual profits do not exceed £ 300,000 in both the previous and the current year.

Canada

In the considered period from 2005 to 2017, a reduced combined corporate tax rate is available for Canadian controlled private corporations having active business income up to CAD 500,000 (2011: CAD 400,000). The reduced tax rate is 16.5% in 2008 and 2009, 16% in 2010, 15.5% in 2011 to 2015, 15% in 2016 and 2017 (before 2008: 18.62%). Moreover, in cases the small business tax rate is applied, the tax rate on dividends is 44.72% instead of the regular rate on dividends.

Japan

From 2008 to 2016, an additional first-year allowance for machinery of 30% on 75% of the acquisition costs is available for companies with capital below JPY 100 million and with less than 1,000 employees. The corporate tax rate for SMEs with taxable income not exceeding JPY 8,000,000 amounts to 22% (before 2009), 18% (2009-2011), 16.5% for 2012-2013 and 15% (since 2014). Furthermore, a reduced enterprise tax of 5.1% (before 2014: 4%) is available if the company's profit is below JPY 8 million and the company's capital is below JPY 100 million. Moreover, the special local tax is reduced for SMEs as well.

United States

In the considered period from 2005 to 2017, reduced federal corporate income tax rates apply depending on the profit amount. The federal corporate income tax rate is 15% up to a taxable profit of USD 50,000.

2. Taxation of Partnerships

Many SMEs do not operate in the legal form of a corporation but are organised as partnerships. Therefore, when considering the situation of SMEs, one also has to analyse the effective tax rate a partnership faces at a location. There are two different tax principles applied to partnerships:

- Taxation as incorporated companies both at the level of the company and at the shareholder level (corporation principle). In this event, in principle, the taxation of partnerships follows the same rules as the taxation of corporations and their shareholders.
- Taxation according to the transparency principle where each partner's share of taxable profits of the partnership is included immediately into the partner's personal taxable income.

Within this report, partnership taxation in six countries is considered.

France

Partnerships in France are taxed according to the transparency principle. The income tax rate in the top bracket is 54% for 1998-2000, 53.25% in 2001, 52.75% in 2002, 49.58% in 2003, 48.09% for 2004-2006 and 40% from 2007-2010. In 2011 and 2012, the top rate is 41%. From 2013 to 2016, the top rate is 45%. In addition, social surcharges are levied which amount to 8.2% and which are deductible up to 5.8% for income tax purposes.

Germany

Partnerships in Germany are taxed according to the transparency principle. The personal income tax follows a progressive schedule from 0% to 53% in 1998-1999, from 0% to 51% in 2000, from 0% to 48.5% in 2001-2003, from 0% to 45% in 2004, from 0% to 42% in 2005-2007, from 0% to 45% in 2008-2009 and from 0% to 42% from 2010 to 2017. However, the personal income tax on business income is capped at 47% in 1998, 45% in 1999 and 43% in 2000. In addition, a solidarity surcharge on the income tax is also levied at a rate of 5.5%.

For the purpose of trade tax and real estate tax, the partnership itself effectively is subject to tax. Both taxes are deductible from the income tax base of the partners in 1998 to 2007. In 2008 to 2017, only real estate tax is deductible. The income tax base of the partners is determined in the same way as the corporate profit tax. The accelerated capital allowance granted to SMEs also applies to partnerships. The tax base of the trade tax and the real estate tax are also determined in the same way as they are for corporations. In addition to its deductibility from taxable income, the trade tax can also be credited against personal income tax at an amount of 180% of a local trade tax multiplier in 2001 to 2007. In 2008 to 2017, the trade tax credit on income tax owed amounts to 380% of the local trade tax multiplier and is limited to the amount of trade tax actually paid. Overall, both measures reduce the effective liability to trade tax to almost zero in 2001 to 2017.

Italy

Partnerships in Italy are taxed according to the transparency principle. The income tax rate in the top bracket is 46% in 1998 and 1999, 45.5% in 2000, 45% in 2001-2004 and 43% since 2009. Partnerships pay the regional tax (IRAP) at ordinary rates. With regard to interest expenses, partnerships are not subject to the 30% EBITDA limitation.

Poland

Partnerships in Poland are taxed according to the transparency principle. However, since 2004, taxpayers can opt for a flat-rate taxation of business income that is equivalent to the corporate income tax rate. From 1998 to 2003, the personal income tax rate in the top bracket is 40%.

Spain

Partnerships in Spain are taxed as corporations. This also includes the special incentives for SMEs mentioned above.

United Kingdom

Partnerships in the United Kingdom are taxed according to the transparency principle. The maximum statutory income tax rate on business income is 40% until 2009, 50% in 2010-2012, and 45% in 2013-2017.

Cost of capital, shareholder level, top rate qualified, by source of finance,

NOTES ON CHANGES IN RESULTS BETWEEN INTERMEDIATE REPORT 2016 AND FINAL REPORT 2017

Changes in domestic results at the corporate level:

Finland

Cost of Capital 2016 was 6.0, is now 6.0

EMTR 2016 was 16.3, is now 17.0

EATR 2016 was 18.9, is now 19.1

Reason for observed changes: The assessment on the depreciation schedule of industrial buildings and machinery has been revised.

France

EMTR 2016 was 32.6, is now 32.7

Reason for observed changes: The real estate tax rate has been adjusted to the officially provided real estate tax rates for 2016.

Spain

Cost of Capital 2016 was 7.9, is now 7.8.

EMTR 2016 was 36.5, is now 36.0.

EATR 2016 was 30.3, is now 30.1.

Cost of Capital 2015 was 8.1, is now 8.1.

EMTR 2015 was 38.6, is now 38.1.

EATR 2015 was 32.9, is now 32.7.

Reason for observed changes: The assessment on the depreciation schedule of machinery has been revised.

Turkey

Cost of Capital 2016 was 4.6, is now 4.8.

EMTR 2016 was -8.0, is now -3.7.

EATR 2016 was 13.5, is now 14.3.

Cost of Capital 2015 was 4.6, is now 4.7.

EMTR 2015 was -8.6, is now -5.5.

EATR 2015 was 13.4, is now 14.0.

Cost of Capital 2014 was 5.8, is now 5.9.

EMTR 2014 was 13.3, is now 13.9.

EATR 2014 was 18.1, is now 18.6.

Cost of Capital 2013 was 5.7, is now 5.9.

EMTR 2013 was 12.6, is now 14.6.

EATR 2013 was 17.9, is now 18.4.

Cost of Capital 2012 was 5.7, is now 5.9.
EMTR 2012 was 12.6, is now 14.6.
EATR 2012 was 17.9, is now 18.4.

Cost of Capital 2011 was 5.7, is now 5.9.
EMTR 2011 was 12.6, is now 14.6.
EATR 2011 was 17.9, is now 18.4.

Cost of Capital 2010 was 5.7, is now 5.9.
EMTR 2010 was 12.6, is now 14.6.
EATR 2010 was 17.9, is now 18.4.

Cost of Capital 2009 was 5.7, is now 5.9.
EMTR 2009 was 12.6, is now 14.6.
EATR 2009 was 17.9, is now 18.4.

Cost of Capital 2008 was 5.7, is now 5.9.
EMTR 2008 was 12.6, is now 14.6.
EATR 2008 was 17.9, is now 18.4.

Cost of Capital 2007 was 5.7, is now 5.9.
EMTR 2007 was 12.6, is now 14.6.
EATR 2007 was 17.9, is now 18.4.

Cost of Capital 2006 was 5.7, is now 5.9.
EMTR 2006 was 12.8, is now 14.8.
EATR 2006 was 17.9, is now 18.5.

Cost of Capital 2005 was 6.2, is now 6.5.
EMTR 2005 was 19.6, is now 22.5.
EATR 2005 was 26.8, is now 27.6.

Reason for observed changes: The approximated annual weighted average interest rate of 14.26% for 2016 has been adjusted to the officially published annual weighted average interest rate of 13.57%. Furthermore, the depreciation schedule for buildings has been revised. Instead of the specific rate of 10%, the general depreciation rate of 2.5% is applied.

Canada

Cost of Capital 2016 was 6.6, is now 6.4.
EMTR 2016 was 24.8, is now 22.1.
EATR 2016 was 25.1, is now 24.3.

Cost of Capital 2015 was 6.6, is now 6.4.
EMTR 2015 was 24.3, is now 21.9.
EATR 2015 was 25.0, is now 24.2.

Reason for observed changes: The assessment on the real estate tax has been revised.

Changes of cross-border results at the corporate level:

Belgium

Reason for observed changes:

The java code underlying the annual calculations of cross-border CoC and EATR has been amended with respect to the ACE at the level of the parent company in the year 2016. A bug underlying the calculations of the results for the year 2014 has been fixed.

The amendment changes the outbound CoC and EATR for Belgium in case the parent is refinanced by retained earnings and new equity and the subsidiary is financed by retained earnings and new equity (2014).

Finland

Reason for observed changes:

The assessment on the depreciation of industrial buildings and machinery has been revised.

The amendment changes all inbound CoC (minor changes) and EATR for Finland (2016).

France

Reason for observed changes:

The real estate tax rate has been adjusted to the officially provided real estate tax rates for 2016.

No change in the overall mean of inbound CoC and EATR.

Italy

Reason for observed changes:

The java code underlying the annual calculations of cross-border CoC and EATR has been amended with respect to the ACE at the level of the parent company in the year 2016. A bug underlying the calculations of the results for the year 2014 has been fixed.

The amendment changes the outbound CoC and EATR for Italy in case the parent is refinanced by retained earnings and new equity and the subsidiary is financed by retained earnings and new equity (2014).

Spain

Reason for observed changes:

The assessment on the depreciation of machinery has been revised.

The amendment changes all inbound CoC and EATR for Spain (2015-2016).

Macedonia

Reason for observed changes:

The assessment of the tax incentive for reinvested profits under the newly introduced regulation for taxation of realized profits has been revised in 2016. A tax incentive is available to taxpayers reinvesting the net profits in business-related tangible or intangible assets. In case the parent company is resident in Macedonia all foreign dividend and interest payments are fully taxed because no further reinvestment at the parent level is assumed. However, if the subsidiary is located in Macedonia a further reinvestment of business profits is assumed which reduced the corporate tax rate to zero on these profits. In 2017, a bug underlying the amended calculations has been fixed.

The amendment changes the inbound CoC and EATR for Macedonia (2015-2016).

Turkey

Reason for observed changes:

The approximated annual weighted average interest rate of 14.26% for 2016 has been adjusted to the officially published annual weighted average interest rate of 13.57%.

The amendment changes the inbound CoC and EATR for Turkey in case the subsidiary is financed by equity (2016)

Furthermore, the depreciation schedule for buildings has been revised. Instead of the specific rate of 10%, the general depreciation rate of 2.5% is applied.

The amendment changes all inbound CoC and EATR for Turkey (2005-2016).

Canada

Reason for observed changes:

The assessment on the real estate tax has been revised. Instead of the general depreciation rate of 4%, the more specific rate of 10% can be applied.

The amendment changes all inbound CoC and EATR for Canada (2015-2016).

Changes in domestic results at the shareholder level:

Norway

Reason for observed changes:

The assessment of the shielding deduction has been adjusted. Instead of the underlying general notional interest rate of 7.1%, the annual shielding interest rate published by the Norwegian Tax Administration is used for the calculation (2006-2016).

Malta

Reason for observed changes:

The taxation of dividends has been revised. Resident individuals receiving dividends distributed out of the profits of the Maltese Tax Account of a resident company are entitled to a six/ seventh tax refund against the personal income tax due on the dividend. The credit is equivalent to the Maltese tax paid by the company on the profits out of which the dividend was distributed (2007-2016).

Portugal

Reason for observed changes:

The applicable personal income tax rate for top rate shareholders has been changed from 27.4% to 28%. The application of the flat tax rate of 28% is beneficial compared to the progressive taxation including the extraordinary surcharge (2013-2016).

Lithuania

Reason for observed changes:

The exemption of interest has been revised. The applicable exemption was abolished with effect of 1 January 2014. Therefore interest income is taxed at 15% in case of top-rate (non-) qualified shareholder (2014-2016).

Macedonia

Reason for observed changes:

The assessment of capital gains taxation has been revised (2013-2015).

Changes in domestic results at the corporate level for SMEs and partnerships:

Lithuania

Reason for observed changes:

The assessment on the real estate tax has been revised. Instead of a basic tax rate of 0.5% a rate of 1.5% is used (2013-2016).

Spain

Reason for observed changes:

The assessment on the depreciation schedule of machinery has been revised (2015-2016).

Canada

Reason for observed changes:

The assessment on the real estate tax has been revised (2015-2016).

Japan

Reason for observed changes:

The assessment of the additional depreciation has been revised (2015).
