

#TaxBuilds

The name of this portal – TAXEDU – is derived from the words ‘Tax’ and ‘Education’. TAXEDU is a European Union pilot project, aiming to educate young European citizens about tax and how it affects their lives.

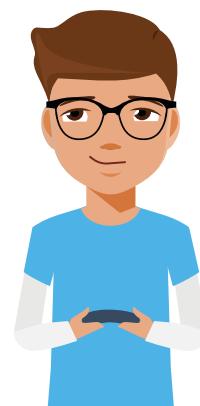

Information is conveyed through games, e-learning material and microlearning clips so that European youngsters can learn about tax in its different forms, and the issues associated with it (tax fraud, tax evasion, etc.) in a fun and engaging way. The portal’s content is translated in all official EU languages.

TAXEDU also addresses teachers, with the teachers’ corner offering resources, tips and tricks on teaching about tax and its benefits at school.

The objectives of the TAXEDU web-portal are to:

- contribute to the fiscal education of young European citizens;
- reduce tax evasion and fraud across Europe, through better information and education in this area;
- provide European citizens with information on the services and facilities that are made possible through tax (education, healthcare, etc.).

The project was led by the European Parliament and the European Commission (Directorate General for Taxation and Customs), while national tax administrations participated. Most importantly, young Europeans were consulted during the creation of this site, and provided feedback on its learning content.

TAXEDU is a tax education portal for young Europeans. **Learn how taxes build your future** via games, microlearning clips and e-Learning modules!
