

Topics recommended for consideration by SMEUnited

May we recommend for consideration the following topic [s], namely, whether there is scope for the development of a consistent set of indicators to capture the potential sustainability-related impact of:

- tax systems (i.e. at a national / regional level); and/or
- organisations and ancillary tax liability (i.e. the possibility of businesses to be taxed on the basis of their departure from achieving the identified sustainability indicators/benchmarks/thresholds).
